- Intersections of Hazing, Mental Health, and Student Well-Being

Cost: \$1,000 per academic year.*

*Discounts are available for institutions serving historically under-served populations such as HBCUs, TCUs, HSIs, and community colleges.

Designed for institutions that are perhaps in the beginning stages of engaging in campus-wide hazing prevention, the StopHazing webinar subscription program provides member institutions with access to four new webinars with companion readings and resources each academic year. Webinars will be recorded and available for campus professionals to rewatch on-demand and share with colleagues at their college or university. Institutions with a webinar subscription will also have the opportunity to send one staff member to a virtual [Hazing Prevention Academy \(HPA\)](#) per academic year and StopHazing staff members will be available to provide assistance to campus professionals via email.

If interested in becoming an institutional member or you have any questions, please contact meredith@stophazing.org.
